Did you know?

Nearly 680,000 voting age citizens are not on the rolls.

That's like ALL of Boston being unable to vote!

Representative
24 Beacon St.

Dear Legislator,

Please support Automatic Voter Registration! AVR will modernize our voter registration process, eliminate unnecessary bureaucracy, and create voter rolls that are more accurate and secure—and, it could save our taxpayers a lot of money in the long run. It’s a common sense solution that’s passed in ten states already. Let’s become #11!

At a time when trust has been shaken in our election systems, AVR can restore confidence that our voter rolls are securely and accurately maintained, while also ensuring that eligible Massachusetts residents have the opportunity to participate.

Please support HD. 2091, and do everything you can to support its passage—this fall!

Thank you,
